Security

Prevent phishing, malware infection and data loss on company smartphones and tablets.

Filter and block access to malicious content, including downloads from unofficial app stores.

Compliance

Stop access to risky apps and websites. Remove distractions by limiting access to entertainment and social media sites during working hours.

Filter websites and apps across Wi-Fi, cellular and roaming.

Control Data Roaming

Cap non-work related data when roaming abroad to avoid unnecessary mobile costs.

Set customized policies tailored to suit the needs of different type of employee: executive, office based, field based etc.

Simplicity

Corrata is simple to deploy with a once-off employee friendly onboarding process.

Corrata is hassle free requiring zero management or administration.

Features

Mobile Security

Prevent malware infection and keep devices secure. Protect user credentials by preventing the latest email, sms or social media scams from reaching your employees' phones. Identify devices which are poorly configured e.g. no passcode.

Robust Web and App Filtering

Block access to inappropriate content considered harmful or illegal. Keep employees productive by limiting usage of social media apps and streaming sites.

Data Roaming Control

Corrata makes it easy to implement data roaming controls on any device. Set daily/monthly caps on data roaming usage and blacklist high bandwidth entertainment apps. Whitelist business critical apps so employees can always get the job done.

Uncompromising User Experience

The Corrata App operates unobtrusively in the background providing control and security without impacting on device performance or employee experience. Corrata provides timely, personalized usage alerts and has a low power and memory footprint.

Ease of Deployment

The Corrata solution works with any iOS (10.5 or later) or Android (6.0 or later) device. Deployment is a simple, once off, employee friendly onboarding process. Deploy directly through the Apple and Android app stores or through an MDM.

Privacy and Confidentiality

By operating 'on device', Corrata avoids the privacy, confidentiality and performance compromises of gateway based solutions.

“

Corrata's security protects employees from phishing and malware attacks and helps us spot jailbroken, misconfigured and out-of-date mobile devices instantly and take action. Inappropriate apps and websites are filtered out, eliminating potential misuse of company resources and helping to limit work-time ”

Kyle Tate, IT Manager
